<p>Days 5 and 6 - Ankanin'ny Nofy</p> <p>Known as the Nest of Dreams, this peaceful and relaxing area is located between Lake Ampitambe, the Indian Ocean, and the Pangalanes Canal. White sandy beaches, lakes, lush vegetation with mangroves and orchids. Many native plants, mainly palm trees, grow there, but you can also see carnivorous plants like Nepenthes and various species of orchids, which bloom in November. Ankanin'nofy is primarily known for the tame lemurs living in the reserve, but there are also reptiles, frogs, and crocodiles. Of particular interest is the opportunity to see and experience different rare lemur species up close. A special attraction is that it is one of the few places in Madagascar where you can observe the very rare Aye-Aye lemurs (<u>Daubentonia madagascariensis</u>) at night, and you can even organize a night hike to see them.</p>	 A close-up photograph of an Aye-Aye lemur, showing its distinctive features: large yellow eyes, a long middle finger, and a dark, spiny coat.
