

6-Day Sailing Tour To Nosy Be, Nosy Iranja, Mitsio, And Radama.

Offer ID: UAM-90

Length of Time: Auf Anfrage

Price from: Auf Anfrage €

The Radama Islands are a volcanic archipelago located approximately 45 miles from Nosy Be. With a full crew on board, you can enjoy your vacation without any worries, as the skipper is very familiar with the area. Book your Day Cruise today and experience the beauty of the Radama Islands in style and comfort!

Travel Days

Day Description	Images
-----------------	--------

Day 1: Nosy Be – Mitsio

Early in the morning, board the catamaran anchored at the Ambatoloaka crater in Nosy Be for a crossing towards the Mitsio Islands.

After crossing sometimes rough seas, you will arrive in the calm and peaceful Mitsio Archipelago. A true oasis of peace and beauty awaits you. You will be amazed to discover a group of uninhabited, untouched islands where dream beaches and turquoise sea offer a grand spectacle.

These little islands form an incredible archipelago, including Zarabandjina, Les Quatres Frères, Nosy Tolholo, and finally the main one, the large Mitsio. In this magnificent bay, there are many beaches that give way to a dream-like landscape. Lush tropical vegetation, with vines, orchids, and baobab trees, make the scenery even more extraordinary.

The main island of the archipelago, Mitsio, is 12 km long, 3 km wide, and rises up to 206 m above sea level not far from the coast. You will find

Day 2: Mitsio-Nosy Ankarea

Explore the Great Mitsio, the stunning beach of Ampasindava, and the Pachypodium forest.

Facing the Marimbe Bay stands the highest island of Mitsio, Nosy Ankarea. From afar, we can already see the massive shape of this large black rock emerging from the ocean. While the north wall is rugged and steep, the entire south coast borders a beautiful white sandy beach with crystal clear water. We anchor a few meters from the shore, offering the opportunity for a wonderful snorkeling session before exploring the island. At the top of the island lies an amazingly green valley abundant with endemic Aloe Vera plants. It can be reached after a slightly acrobatic climb, but the views all around are breathtaking.

Behind the southwestern tip of the island are basalt organs, a geological formation of black basalt.

In the afternoon, we set off towards Nosy Ankarea, a table-shaped basalt island bordered by white sand. A trail leads to the summit of the

Day 3: Nosy Lava-Nosy Antaly

Departure to Nosy Lava, a volcanic island bordered by steep cliffs plunging into the sea.

This island is located opposite the city of Analalava on the mainland. With its turquoise waters, coconut palms, fine sandy beach, and white limestone cliffs, Nosy Lava has everything that makes a paradise.

A sandbar connects the two parts of the island.

Visit to the shark fisherman village. Lunch on board and journey to Nosy Antaly.

Overnight in Nosy Antaly.

Day 4: Nosy Tsarabanjina

Departure to Nosy Tsarabanjina, a magnificent island surrounded by white sandy beaches (in Madagascar, its name means white sand island) immersed in crystal clear waters.

Nosy Tsarabanjina, sacred island of the Sakalava people

Nosy Tsarabanjina is a small piece of paradise in the middle of the ocean. Starting from Nosy Be, this island in the Mitsio Archipelago promises white sandy beaches and lush land.

It is considered the most beautiful island in the Mitsio. Colorful fish and corals teeming with life will leave you with memories full of wonder.

Animals also on land

The island is home to a very diverse fauna: lemurs, chameleons, giant bats. But also whales, dolphins, turtles, and manta rays.

Immerse yourself in the abundant nature that the island offers.

Day 5: Nosy Faly

Nosy Faly, the Sacred Island

Known as the Sacred Island, Nosy Faly is where the ancestors of the Sakalava, a Malagasy tribe, are buried. The locals will introduce you to the beauty of their island as well as their rituals and customs.

A Preserved Island

Considered sacred in Malagasy beliefs, great respect is also given to the island's ecosystem. The ecosystem of the island is best preserved by the locals, as well as the establishments that have settled there, most of which are eco-lodges.

Breathtaking Views

After a short walk, climb up the disused lighthouse on the island to enjoy a 360° view of the island and neighboring islands. Witness the sunrise and sunset for an unforgettable experience!

Arrive in the late afternoon towards Nosy Faly

Day 6: Nosy Be – Nosy Tanikely

Embark on a journey to the marine park of Nosy Tanikely, known for its rich coral reefs and frequent visits by sea turtles.

With its diverse coral reef and prime location in the middle of the bay of Nosy Be in Madagascar, Nosy Tanikely is often referred to as a "natural aquarium".

The marine protected area of Nosy Tanikely, with its abundance of coral and exceptional species diversity, provides a habitat for many underwater creatures.

The warm tropical waters and the sediment brought by the Sambirano River support a wide variety of species that call this small island home.

In fact, the entire island is home to a diverse and spectacular fauna. Enjoy lunch on board in the morning, followed by a return to the crater and disembarkation in the afternoon.

End of the tour.
